

It is your responsibility to ensure that the American public has access to unbiased information. When a limited number of entities control the press and the airwaves, the public will be subject to those entities viewpoints and their opinions and their determinations of what we need to know. Allow diversity so that I may choose to form my own opinions and make my decisions without having to filter through the bias that may be inflicted on me. Allowing 1 or 2 or 3 entities to control the media ensures that the public will know what the public "needs" to know. War was fought in Irac to give people freedom and enable them to gain access to unbiased news - news not manufactured by one individual and his cronies. Don't take this same privilege - to receive impartial reporting and broadcasting - away from the American public.
